

IT Tester (Verification Engineer)

OncoDNA helps oncologists to choose the most appropriate treatment for each patient's cancer profile. In addition to diagnostic tests, OncoDNA has developed a data interpretation platform (SaaS model) for cancer centres. OncoDNA is one of the European leaders in the field of precision medicine. The company is based in the Gosselies Biopark and employs 45 people in four countries.

As part of its growth, OncoDNA is looking for an IT Tester (Verification Engineer) to join the IT Team.

As a team member of the Requirements and Tests Team, you will be responsible for implementing automated test solutions, fitting with current test solutions.

The job requires good knowledge/experience of testing methodologies & skills.

You will be accountable for implementing automation suites to cover the system requirements defined by the team.

You will perform software testing in all phases of the design-develop-test-release-maintain software life cycle.

You will also be in charge of the whole framework and tools needed for these automated scripts.

REQUIREMENTS:

- ✓ Master's degree in computer science or engineering
- ✓ Experience in developing automated test scripts
- ✓ Experience in preparing end to end test scenarios
- ✓ Experience in preparing traceability matrix and reports to quality department is a plus
- ✓ Knowledge of Agile project management method, particularly Scrum is a plus
- ✓ Knowledge of gitlab CI is a plus
- ✓ Knowledge of Python and JS development ecosystem is a plus

YOUR PROFILE:

- ✓ Stress resistant
- ✓ Able to work with a Team and project management
- ✓ Possess thorough knowledge of several testing tools
- ✓ Focus on customer satisfaction - quality driven
- ✓ Solid understanding of data analysis, as well as solid scientific background
- ✓ Solid understanding of Information Technology and Data Science
- ✓ You are fluent in English (oral & written), a second European language is an asset

WE OFFER YOU:

- A challenging position within a dynamic and growing company.
- An opportunity to play a role in the company's scale-up phase
- An international environment in a rapidly changing digital industry
- A young, dynamic and involved team in the fight against cancer
- An attractive package commensurate with the position, responsibilities and its context

ABOUT:

At OncoDNA we strive to help cancer patients. OncoDNA offers solutions combining the most relevant molecular technologies in order to provide a comprehensive characterization of the patient's cancer, hence supporting oncologists in their treatment and follow-up decisions.
