

Legal Advisor

OncoDNA, the healthcare technology company making precision medicine a reality, is looking for a Legal advisor (m/f)

Your primary role will be to offer deal support to all business and projects within the company (drafting, review, participation to negotiation,...). As trusted advisor, you will provide legal advice to all departments and to the Executive Committee on all legal matters, risks and obligations connected to OncoDNA's business. You will be also responsible for the data protection strategy and implementation, to ensure compliance with GDPR requirements and all applicable laws of the healthcare sector. You will actively participate to each tendering procedures. You will develop and promote corporate legal standards and practices. You will ensure a proper management of legal and contractual documents.

You hold a Master Degree in Law with a proven experience as in-house legal counsel for a minimum of 5 years, preferably in the life sciences / healthcare industry. Practice in privacy and data protection law, in particular knowledge of the GDPR is a strong asset. Any additional qualifications (e.g. DPO or IAPP certification) is considered as an additional asset.

As company lawyer, with an affinity with our business, you are comfortable with drafting and negotiating legal terms for a wide variety of business relationship agreements including NDAs, MTAs, services agreements, distributors agreements,...

You are pragmatic, organized, process-oriented with a high level of self-motivation and discipline.

You are a team-player with the ability to work independently whenever necessary.

Pro-active communicator with an excellent command of both English and French. Another European language is an asset.

You like to work in a fast changing and international environment.

INTERESTED TO JOIN OUR TEAM?

ABOUT ONCODNA:

OncoDNA is a private, oncology-focused healthcare technology company that combines advanced, comprehensive testing of all clinically relevant cancer biomarkers (DNA, RNA and protein profiles) from both solid and liquid biopsies with a proprietary cancer treatment knowledge database called OncoKDO™ that continuously 'learns' from cutting-edge, validated, scientific and medical advances. This one-stop-shop analysis and interpretation service gives oncologists actionable results to enable the selection of treatments tailored to an individual patient's cancer profile.

OncoDNA also works in collaboration with the biopharma industry to develop and deliver the treatments of tomorrow by assisting with design, enrolment and assessment of clinical trials as well as increasing access to approved precision medicines.

The company is based in Gosselies, Belgium, and employs c.55 employees in four countries.
